

Priority Equipment List 2023-24

The Trenton Memorial Hospital Foundation raises funds towards priority medical equipment that the government does not provide.

Quinte Health – Trenton Memorial Hospital is the QHC Centre for Excellence for all Ophthalmology, Dental Surgery, Same Day Surgery, Vein Clinic, Urodynamics Clinic, Cervical Cancer Clinic and Regional Comprehensive Breast Assessment Centre, Cystoscopy and Green Light Laser.

Hospital equipment is continuing to advance at a rapid pace, and new technologies are being developed to help diagnose and treat a range of disorders and diseases at TMH!

Please consider making a gift towards our equipment needs.

Radiology/Ortho	Mobile C-Arm	239,442
Recovery Room	Patient Monitors & Respiratory Modules	127,363
Surgery	Welch Allyn vital signs monitor	19,326
		1,606,539

ER staff were fantastic!

They immediately addressed my concerns, did my blood work and set up a referral right away. The very next morning I got in to my scan and had a resolution to my concern.

Hands down the best hospital visit I have ever had was here.

Both night staff (Madison) and day staff (Ang) and Logan exceeded my expectations!

Thank you for everything you do!!!

Tegan Lynch

For anyone with children, I would highly recommend Trenton Memorial Hospital!

Jessica Anne

Every time I have had to take my 4-year-old daughter to Trenton Memorial Hospital, I have left feeling relieved, comforted and satisfied with the care provided.

Nurses Lisa and Tricia were amazing with my daughter, Anesthesiologist Dr. C, and Dental Surgeon Dr. Mansoor have provided exceptional services, as well as given excellent support to myself. Ensuring that I understand and am comfortable with treatments given.

For anyone with children, I would highly recommend Trenton Memorial Hospital!

I cannot express how much I appreciate the care and kindness that was shown to my sister, today. The volunteers, the administration staff, the nurses and the doctors were phenomenal. Of course, there were a few gripes from others about the wait time, but by 11 am, the green line was open and patients were being seen quickly. It was especially busy today but that did not interfere with the thorough care and attention that my sister received. Her diagnosis was not something they see every day but those doctors were smart and on top of it! When they thought they had a care plan they would consult and research more and change it to ensure the best outcome for my sister. I cannot say enough great things about them or the nursing staff! I hope we all continue to lobby for TMH to keep its doors open and its services available to our community. When a volunteer comes up and asks you for a signature, do it. We need community care and we need to keep doctors and nurses like the ones I saw today by having a full serviced hospital where they can care to the best of their ability.

Cindy Lou Nickerson

Dr. Hayman – kind and caring in TMH Emergency Department

“We received an absolutely devastating diagnosis on our visit to TMH. Dr Hayman was kind and caring and so very professional and informative in his support with this diagnosis. He was clear with next steps and he and the nursing staff set the ball in motion for what happens next. In the darkness of this news, the staff were the light we needed.” – *a grateful patient.*
