

# PRIORITY EQUIPMENT LIST 2022-23

**With your generosity, we ensure that our hospital is not just a building but a place of healing.**

**New technology is making it much easier to diagnose and treat various disorders and diseases at our local hospitals. It is advancing at a rapid pace and that's why the Trenton Memorial Hospital Foundation must continue to raise the funds to purchase this equipment so that this community receives better healthcare outcomes.**

**The provincial government funds the operating costs of the hospital to keep the lights on and instruments clean, but it does not fill the gap to providing vital equipment needed to care for you, your family or your friends.**

**Please consider making a gift to help improve a patient's life today!**

## THOROUGH AND EFFICIENT CARE THROUGH COMPREHENSIVE BREAST ASSESSMENT PROGRAM

SEPTEMBER 21, 2022

“I had a mammogram at BGH and they saw something so they sent me to Trenton Memorial Hospital’s Comprehensive Breast Assessment program. I was amazed at the thorough, efficient care I received. A mammogram and then an ultrasound – no return visits or follow up appts. They will even do a biopsy right then and there if need be. Totally amazing and exactly the kind of care you need in that type of situation. No waiting or wondering or stressing. One stop shopping with all testing done at once and you know the results when you leave. The staff are phenomenal and put you completely at ease. I can’t recommend them enough. Thank you so much!!!” – *Heather Anderson*

From left: Alana Carr-Matthews, sonographer; Kim Mullen, sonographer; Dr. Brandy Moran, radiologist; Angela Murphy, mammographer.

### We all Provide Care

We want to thank all the doctors, nurses, PSW’s, Dietician and food service department in both Trenton Memorial Hospital and Belleville General Hospital for your patience and not giving upon Connie and saving her life.... Please know that we appreciate you all so much for all your support it is what motivates and encourages us to continue to do our part to help our community and give back as much as we can.

Raole and Connie, Riverbrake Cafe

**Donating investments is a good way to reduce your capital gains.** If you make charitable donations each year, consider donating the stock to charity instead.

**TOGETHER WE CAN MAKE A DIFFERENCE IN SOMEONES LIFE.**

**What inspires you to give to save a life?**

**It could be yours!**

<b>Essential - Clinical Budget</b>	<b>For 2022-2023 Trenton Memorial Hospital</b>	<b>\$2,117,069.</b>

Having the tools needed at our disposal is the best way for us to provide a clear diagnosis for our patients and establish a timely treatment plan for their care. Not using equipment with the latest technology and mean life or death in some cases. Donating to help purchase new equipment and replace old is a great way to show your gratitude for the care you've received at our hospital.

## **ER staff were fantastic!**

They immediately addressed my concerns, did my blood work and set up a referral right away. The very next morning I got in to my scan and had a resolution to my concern.

Hands down the best hospital visit I have ever had was here.

Both night staff (Madison) and day staff (Ang) and Logan exceeded my expectations!

Thank you for everything you do!!!

Tegan Lynch

## **For anyone with children, I would highly recommend Trenton Memorial Hospital!**

Jessica Anne

Every time I have had to take my 4-year-old daughter to Trenton Memorial Hospital, I have left feeling relieved, comforted and satisfied with the care provided.

Nurses Lisa and Tricia were amazing with my daughter, Anesthesiologist Dr. C, and Dental Surgeon Dr. Mansoor have provided exceptional services, as well as given excellent support to myself. Ensuring that I understand and am comfortable with treatments given. For anyone with children, I would highly recommend Trenton Memorial Hospital!

I cannot express how much I appreciate the care and kindness that was shown to my sister, today. The volunteers, the administration staff, the nurses and the doctors were phenomenal. Of course, there were a few gripes from others about the wait time, but by 11 am, the green line was open and patients were being seen quickly. It was especially busy today but that did not interfere with the thorough care and attention that my sister received. Her diagnosis was not something they see every day but those doctors were smart and on top of it! When they thought they had a care plan they would consult and research more and change it to ensure the best outcome for my sister. I cannot say enough great things about them or the nursing staff! I hope we all continue to lobby for TMH to keep its doors open and its services available to our community. When a volunteer comes up and asks you for a signature, do it. We need community care and we need to keep doctors and nurses like the ones I saw today by having a full serviced hospital where they can care to the best of their ability.

Cindy Lou Nickerson

## **Dr. Hayman – kind and caring in TMH Emergency Department**

“We received an absolutely devastating diagnosis on our visit to TMH. Dr Hayman was kind and caring and so very professional and informative in his support with this diagnosis. He was clear with next steps and he and the nursing staff set the ball in motion for what happens next. In the darkness of this news, the staff were the light we needed.” – a grateful patient.
